

Ms Andrea Zengő

Co-founder and President

WITSEC

Andrea Zengő is in the IT field since 1992. She started her career as a computer programmer, and moved to the IT environment management in 2000, and included the security and compliancy fields around 2005.

She spent 17 years in the transaction processing field, working on different areas, like IT environment management, business continuity management, project management, compliancy, internal audit and security. Between 2012 and 2018 she led the Internal audit and Security at SIA Central Europe, and her responsibility also included the role of the BCM Coordinator of the company. Today she is working as the Chief Security Officer at Black Cell Kft, leading the Consultation Division of the company.

She studied computer science at Mihály Pollack Technical College, economics at the College of Foreign Trade and management skills at Corvinus University. She has Certified Information Systems Auditor (CISA) and Certified Information Security Manager (CISM) certifications from ISACA and Certified Information Systems Security Professional (CISSP) certification from (ISC)2 and Certified Ethical Hacker (CEH) from EC-Council.

She is founding member of WITSEC (Women in IT Security) and the President of the association.
